BUCKET CAPACITY		3.8 – 6.1 m^3

HIGH PRODUCTIVITY & LOW FUEL CONSUMPTION

- Variable Displacement Piston Pump & Closed-center Load Sensing System (CLSS)
- High Performance Komatsu SAA6D125E-5 Engine
- Low Fuel Consumption
- Dual-mode Engine Power Select System
- Large-capacity Torque Converter
- Automatic Transmission with Mode Select System
- Lock-up Torque Converter (Optional)

INCREASED RELIABILITY

- Komatsu Components
- High-rigidity Frames
- Wet Multiple-disc Brakes and Fully Hydraulic Braking System
- Hydraulic Hoses Use Flat Face O-ring Seals
- Sealed Connectors
- Cation Electrodeposition Primer Paint/ Powder Coating Paint

EASY MAINTENANCE

- Gull-wing Type Engine Side Doors Open Wide
- Equipment Management Monitoring System
- Easy Radiator Cleaning with Reversible Fan
- Automatic Reversible Fan (Optional)

EXCELLENT OPERATOR ENVIRONMENT

- Pillar-less Large Cab
- Low-noise Design
- Electrically Controlled Transmission Lever
- Automatic Transmission with Electronically Controlled Modulation Valve
- Variable Transmission Cut-off System
- Fingertip Control Levers

SAFETY

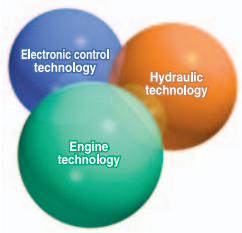
- ROPS/FOPS Cab (ISO 3471/ISO 3449)
- Rear-hinged Full Open Cab Door

KOMTRAX

- KOMTRAX

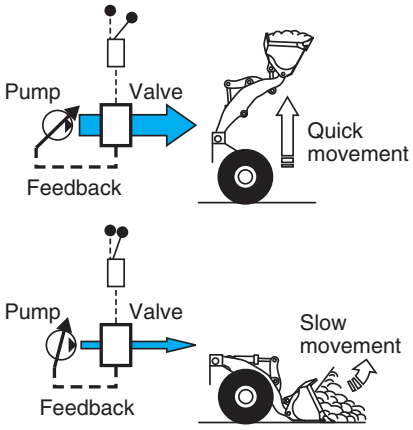
HIGH PRODUCTIVITY & LOW FUEL CONSUMPTION

Variable Displacement Piston Pump & Closed-center Load Sensing System (CLSS)

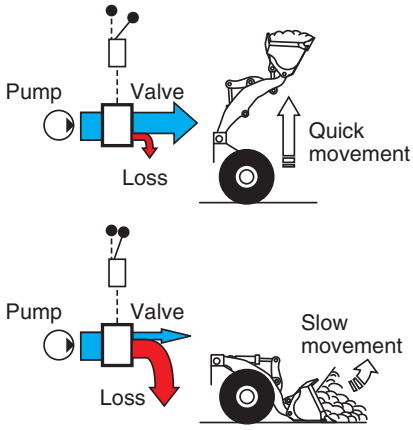


New design variable displacement piston pump combined with the Closed-center load sensing system delivers hydraulic flow just as the job requires preventing wasted hydraulic pressure. Minimized waste loss contributes to better fuel economy.

- **New variable displacement piston pump:** The pump delivers only necessary amounts minimizing waste loss.



- **Fixed displacement piston pump:** The pump delivers the maximum amount at any time and the unused flow is disposed.

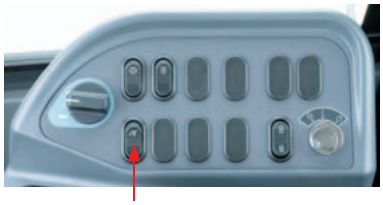


Faster Travel & Lower Fuel Consumption

- **High performance SAA6D125E-5 engine**
  Electronic Heavy Duty Common Rail fuel injection system provides optimum combustion of fuel.
  This system also provides fast throttle response to match the machine's powerful tractive effort and fast hydraulic response.
  223 kW 299 HP (Net)

- **Low fuel consumption**
  The fuel consumption is reduced greatly because of the low-noise, high-torque engine and the large-capacity torque converter with maximum effi ciency in the low-speed range.

- **Dual-mode engine power select system**
  This wheel loader offers two selectable operating modes—E and P. The operator can adjust the machine's performance with the selection switch.
  - **E Mode:** This mode provides maximum fuel efficiency for general loading.
  - **P Mode:** This mode provides maximum power output for hard digging operation or hill climb.



Dual mode engine power selection switch

- **ECO indicator**
  The ECO indicator will help an operator to promote energy saving.

ECO indicator

- **Large-capacity torque converter**
  Newly designed drive train has a large-capacity torque converter for optimal efficiency. The WA480-6R has plenty of acceleration without the need for full throttle and it can achieve high travel speeds, even on grades or steep ramps leading to feed hoppers. This significantly assists productivity and also delivers great value for load-and-carry operations.

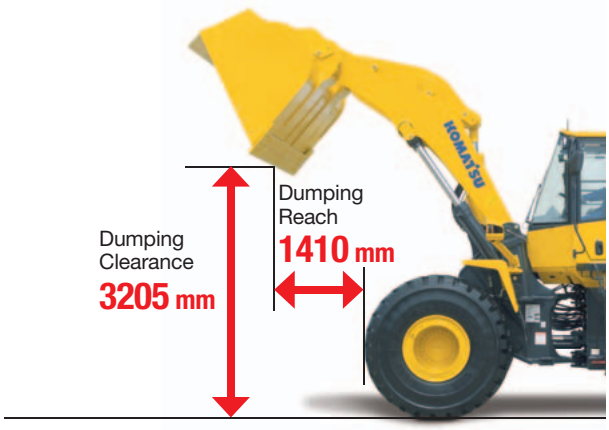
- **Automatic transmission with mode select system**
  This operator controlled system allows the operator to select manual shifting or two levels of automatic shifting (low, and high). Auto L mode is for fuel saving operation with the gear shift timing set at lower speeds than Auto H mode. Therefore Auto L mode keeps the engine in a relatively low rpm range for fuel conservation while yielding adequate tractive force by depressing the accelerator pedal.

Shift mode selection switch

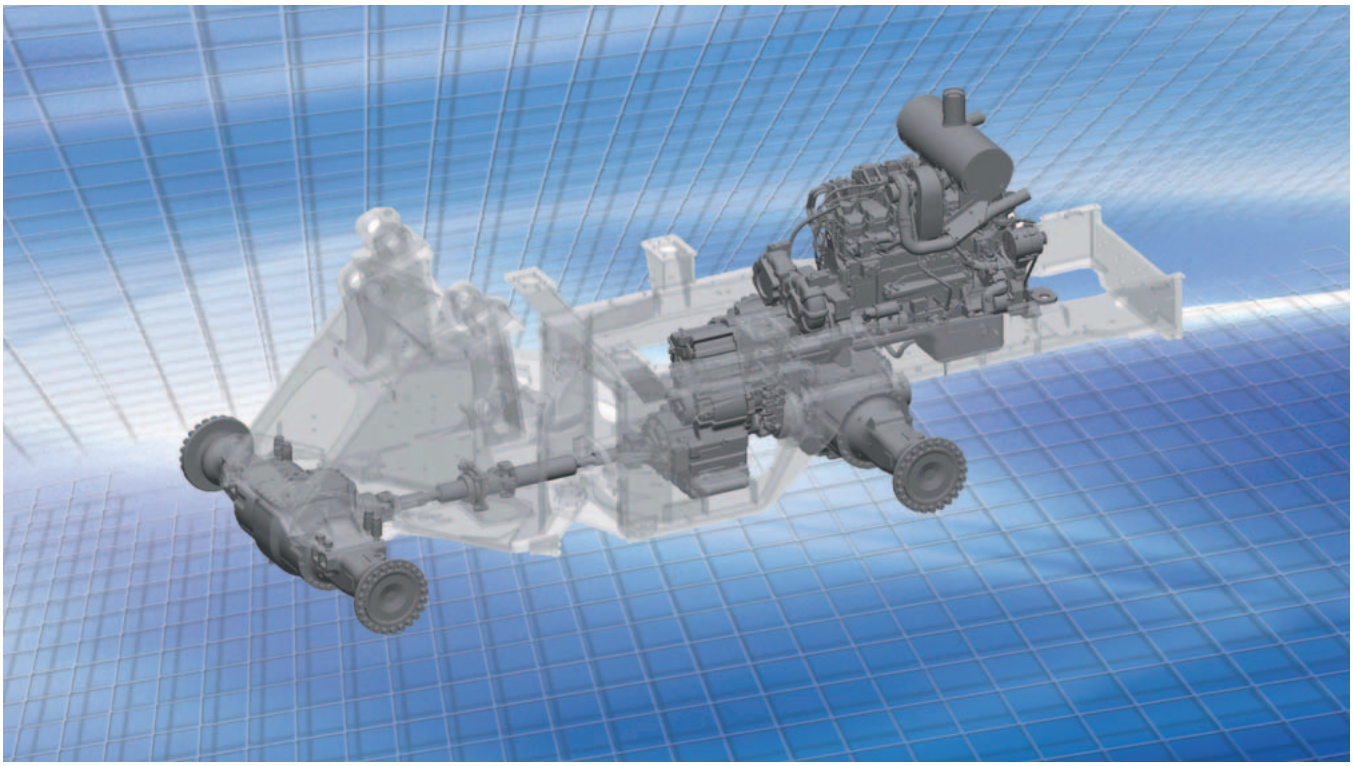
- **Lock-up torque converter (Optional)**
  The Komatsu designed lock-up torque converter provides increased production efficiency, reduced cycle times and optimum fuel savings in load & carry or hill-climb operations. The operator can engage the system from 2nd to 4th gear. This optional feature allows the operator to activate the system on/off with a switch located on the right-side control panel.

Maximum Dumping Clearance and Reach

The long lift arms provide high dumping clearances and maximum dumping reach. The operator can even level loads on the body of a dump truck easily and efficiently.
(4.6 m^3 bucket with Bolt on Cutting Edge, 26.5R25 tires)



INCREASED RELIABILITY

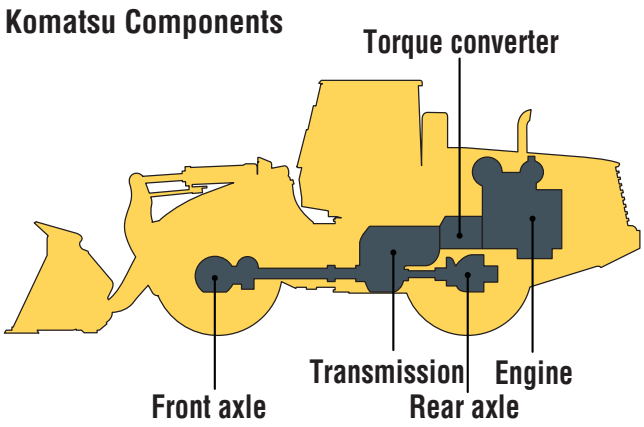


Komatsu Components

Komatsu manufactures the engine, torque converter, transmission, hydraulic units, electric parts, on this wheel loader. Komatsu loaders are manufactured with an integrated production system under a strict quality control system.

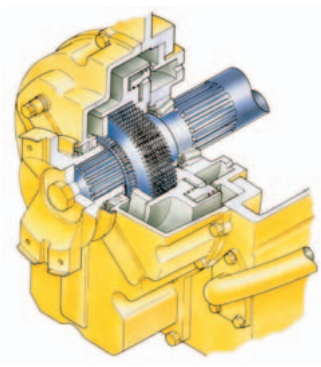
High-rigidity Frames and Loader Linkage

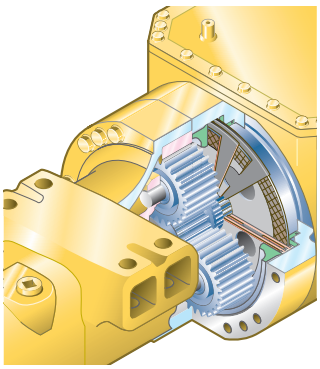
The front and rear frames and the loader linkage have more torsional rigidity to secure resistance against increased stress due to the use of a larger bucket. Frame and loader linkage are designed to accommodate actual working loads, and simulated computer testing proves its strength.



Wet Multiple-disc Brakes and Fully Hydraulic Braking System

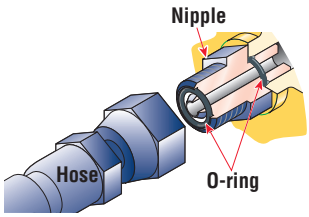
This means lower maintenance costs and higher reliability. Wet multiple-disc brakes are fully sealed. Contaminants are kept out, reducing wear and maintenance. Brakes require no adjustments for wear, meaning even lower maintenance. The new parking brake is also an adjustment-free, wet multiple-disc for high reliability and long life.
Added reliability is designed into the braking system by the use of two independent hydraulic circuits. Provides hydraulic backup should one of the circuits fail.
Fully hydraulic brakes mean no air system to bleed, or the condensation of water in the system that can lead to contamination, corrosion, and freezing.



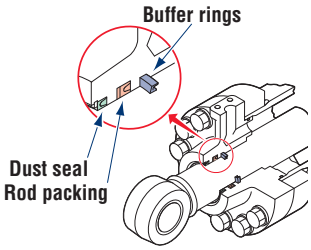


Reliable Hydraulic Line

- **Flat face-to-face o-ring seals**
  Flat face-to-face O-ring seals are used to securely seal hydraulic hose connections and to prevent oil leakage.



- **Buffer rings**
  In addition, buffer rings are installed to the head side of the all-hydraulic cylinders to lower the load on the rod seals and maximize the reliability.



Sealed Connectors

Main harnesses and controller connectors are equipped with sealed connectors providing high reliability, water resistance and dust resistance.

Cation Electrodeposition Primer Paint/ Powder Coating Final Paint

Cation electrodeposition paint is applied as a primer paint and powder coating is applied as topcoat to the exterior sheet metal parts. This process results in a beautiful rust-free machine, even in the most severe environments. Some external parts are made of plastic providing long life and high impact resistance.

Bucket Side Guard (Optional)

In addition to the conventional side guard of plate type (for loading products), the bolt-on side guard made of cast steel can be installed optionally. Since it is so designed that the material can flow smoothly on it, it does not increase the digging resistance.

EASY MAINTENANCE

Gull-wing side doors upper stop position

Gull-wing Type Engine Side Doors Open Wide

The operator can open and close each gull-wing type engine side door easily with the assistance of a gas spring to perform daily service checks from the ground.

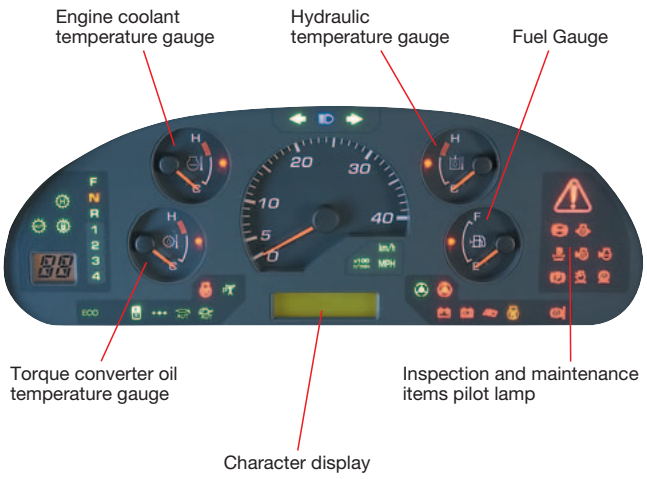
Gull-wing side doors upper stop position

Equipment Management Monitoring System

Monitor is mounted in front of the operator allowing the operator to easily check gauges and warning lights.
A specially designed two-spoke steering wheel allows the operator to easily see the instrument panel.

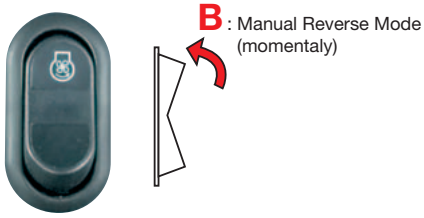
Maintenance Control and Troubleshooting Functions

- **Action code display function.** If the loader has any troubles, the monitor displays action details on the character display at the center bottom of the monitor.
- **Monitor function.** Controller monitors engine oil level, pressure, coolant temperature, air cleaner clogging etc. If controller finds abnormalities, all of these are displayed on LCD.
- **Replacement time notice function.** Monitor informs replacement time of oil and filters on LCD when it reaches replacement intervals.
- **Trouble data memory function.** Monitor stores abnormalities for effective troubleshooting.

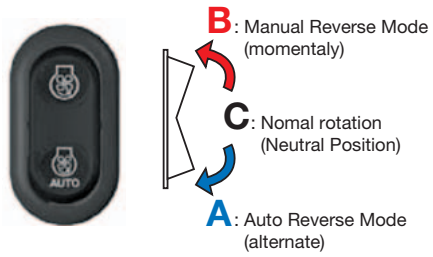


Easy Radiator Cleaning

If the machine is operating in adverse conditions, the operator can reverse the hydraulic cooling fan from inside the cab by pressing a switch on the control panel.



- **Automatic reversible fan (Optional)**
  The engine fan is driven hydraulically and can be operated in reverse automatically.When the switch is in the automatic position, the fan revolves in reverse for 2 minutes every 2 hours intermittently (default setting).



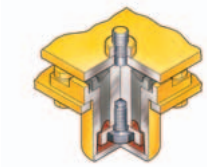
EXCELLENT OPERATOR ENVIRONMENT

Pillar-less Large Cab

A wide pillar-less flat glass provides excellent front visibility. The wiper arm covers a large area to provide great visibility even on rainy days. The cab area is the largest in its class providing maximum space for the operator. Increased seat slide adjustment to backward by introducing front mounted air conditioner unit.

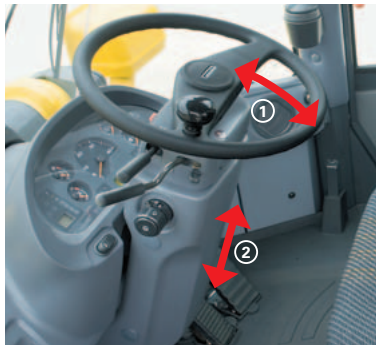
Low-noise Design

Noise at operator's ear noise level (ISO 6396:2008): 72 dB(A)
Dynamic noise level (outside) (ISO 6395:2008): 112 dB(A)
The large cab is mounted with Komatsu's unique ROPS/FOPS (ISO 3471/ISO 3449) viscous mounts.
The low-noise engine, hydraulically driven fan, and hydraulic pumps are mounted with rubber cushions, and the cab sealing is improved to provide a quiet, low-vibration, dustproof with pressurizing, and comfortable operating environment. Also, exterior noise is lowest in this class.



Telescopic/Tilt Steering Column

The operator can tilt and telescope the steering column to provide a comfortable working position.



①Tilt adjustment
②Telescopic adjustment

Electrically Controlled Transmission Lever

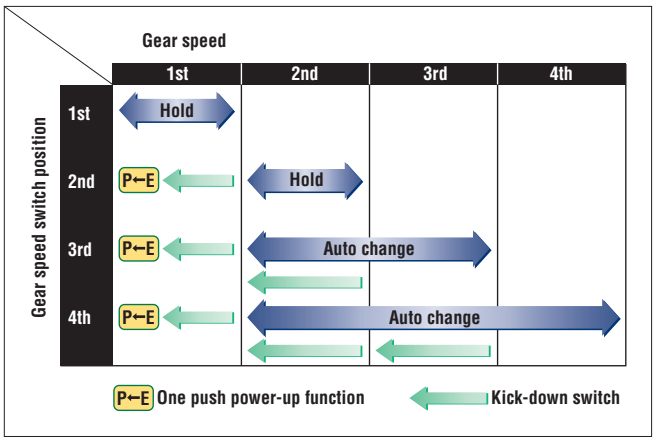
Easy shifting and directional changes with Komatsu two-lever electronic shifting. Change direction or shift gears with a touch of the fingers without removing the shifting hand from the steering wheel. Solid state electronics and conveniently located direction and gear shift controls make this possible. Automatic shifts in ranges two through four keep production high and manual shifting at a minimum.

①Directional lever
②Gear shift lever

Automatic Transmission with Electronically Controlled Modulation Valve

Automatic transmission with Electronically Controlled Modulation Valve automatically selects the proper gear speed based on travel speed, engine speed, and other travel conditions. The Electronically Controlled Modulation Valve system engages the clutch smoothly to prevent lags and shocks when shifting. This system provides efficient machine operation and a comfortable ride.

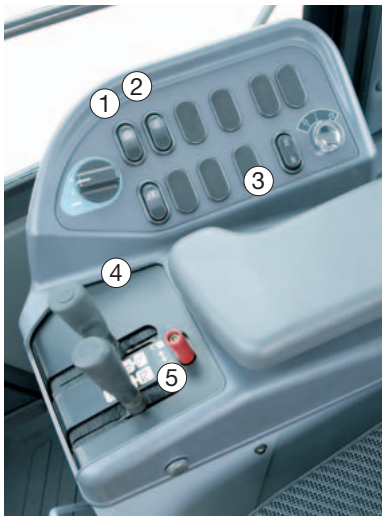
- **Kick-down switch**
  Consider this valuable feature for added productivity. With the touch of a finger, the kick-down switch automatically downshifts from second to first when beginning the digging cycle. It automatically upshifts from first to second when the direction control lever is placed in reverse. This results in increased rim pull for better bucket penetration and reduced cycle times for higher productivity.
- **One push power-up function**
  The kick-down switch also functions as a power-up switch in first gear. The first time the kick-down switch is depressed it functions as a kick-down switch and gear speed is reduced. When the machine is in E operation mode and first gear, pressing the kick-down switch a second time changes the operation mode to P allowing increased power for heavy digging operation. The operation mode returns to E when machine gear speed changes or direction changes to reverse.
- **Hold switch**
  Auto shift is selected and if the operator turns on this switch when the lever is at the 3rd or 4th gear speed position, the transmission is fixed to that gear speed.



Variable Transmission Cut-off System

The operator can continuously adjust the transmission cut-off pressure desired for the left brake pedal using switch located on the right-side control panel. The operator can improve the working performance by setting the cut-off pressure properly depending on working condition.

- High cut-off pressure for digging operations.
- Low cut-off pressure for truck-loading operations.



1:Cut-off ON/OFF switch
2:Cut-off adjustment switch
3:Fan reverse ON/OFF switch
4:Boom control
5:Bucket control

Fingertip Work Equipment Control Levers with Large Size Arm Rest

New Pressure Proportional Control (PPC) control levers are used for the work equipment. The operator can easily operate the work equipment with fingertip control, reducing operator fatigue and increasing controllability. The PPC control lever column can be slid forward or rearward and the large size arm rest can be adjusted up or down to provide the operator with a variety of comfortable operating positions.

SAFETY

ROPS/FOPS Cab

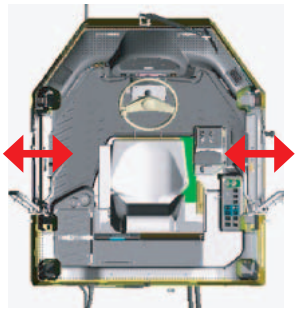
The ROPS/FOPS Cab is standard for operator's safety.
A wide pillar-less flat glass provides excellent front visibility, and a heated rear window provides excellent rear visibility in cold and freezing weather conditions.
ROPS (ISO 3471) : Roll-over Protective Structure
FOPS (ISO 3449) : Falling Objects Protective Structure

Rear-hinged Full Open Cab Door

The cab door hinges are installed to the rear side of the cab providing a large opening angle for the operator to enter and exit. The steps are designed like a staircase, so that the operator can get on and off the cab easily.

Left or Right Side Cab Entry

The operator can get on and off the machine from either side of the vehicle. This design is convenient when getting on and off in a narrow jobsite or on uneven ground.



Safety Features

- **Secondary steering (Optional)**
  If the steering pump is disabled, a secondary steering pump provides hydraulic flow.

- **Two independent lines brake system**
  Added reliability is designed into the braking system by the use of two independent hydraulic circuits, providing hydraulic backup should one of the circuits fail.

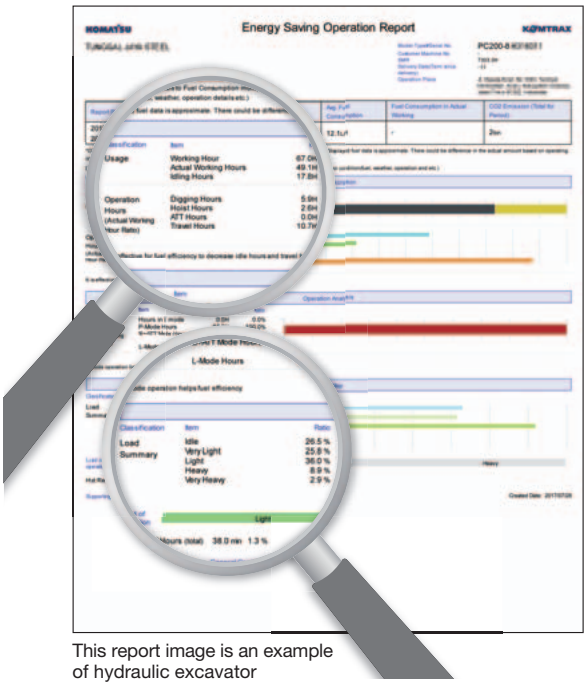
- **Battery disconnect switch (Optional)**
  The battery disconnect switch is located in the right side battery box. This can be used to disconnect power when performing service work on the machine.

KOMTRAX

The Komatsu remote monitoring and management technology provides insightful data about your equipment and fleet in user-friendly format.

Energy Saving Operation Report

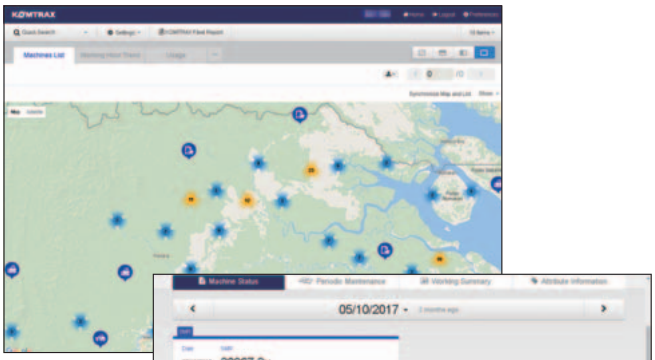
KOMTRAX delivers the energy-saving operation report based on the operating information such as fuel consumption, load summary and idling time, which helps you efficiently run a business.



This report image is an example of hydraulic excavator

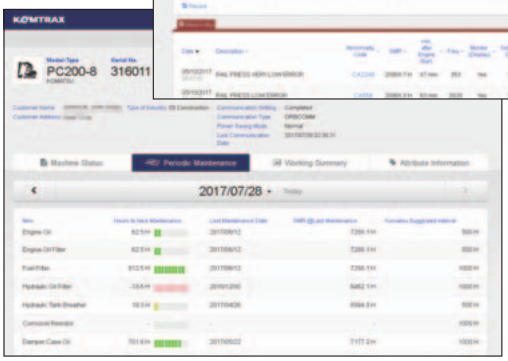
Equipment Management Support

Through the web application, a variety of search parameters are available to quickly find information about specific machines based on key factors. Moreover, KOMTRAX finds out machines with problems from your fleet and shows you through an optimal interface.



Location

Working status

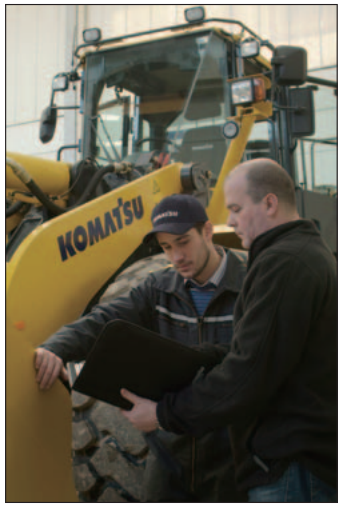


Periodic maintenance

The report contents and data depend on the machine model.

Optimal Strategy for Efficient Work

The detailed information that KOMTRAX puts at your fingertips helps you manage your fleet conveniently on the web anytime, anywhere. It gives you the power to make better daily and long-term strategic decisions.



SPECIFICATIONS

ENGINE

Model . . . . . Komatsu SAA6D125E-5
Type. . . . . Water-cooled, 4-cycle
Aspiration . . . . . Turbocharged, aftercooled
Number of cylinders 6
Bore x stroke. . . . . 125 mm x 150 mm
Piston displacement . . . . . 11.04 L
Governor . . . . . All-speed, electronic
Horsepower
  SAE J1995 . . . . . Gross 224 kW 300 HP
  ISO 9249/SAE J1349* . . . . . Net 223 kW 299 HP
  Rated rpm. . . . . 2000 min^{-1}
Fan drive method for radiator cooling . . . . . Hydraulic
Fuel system . . . . . Direct injection
Lubrication system:
  Method . . . . . Gear pump, force-lubrication
  Filter . . . . . Full-flow type
Air cleaner . . . . . Dry type with double elements and dust evacuator, plus dust indicator

*Net horsepower at the maximum speed of radiator cooling fan is 211 kW.
U.S. EPA Tier 2 and EU Stage 2 emissions equivalent.

TRANSMISSION

Torque converter:
  Type 3-element, 1-stage, 1-phase
Transmission:
  Type . . . . . Full-powershift, contershaft type
Travel speed: km/h
  Measured with 26.5R25 (L-3) tires

	1st	2nd	3rd	4th
Forward	7.7	13.1	22.9	36.3
Reverse	7.9	13.5	23.6	37.4

AXLES AND FINAL DRIVES

Drive system . . . . . Four-wheel drive
Front . . . . . Fixed, semi-floating
Rear. . . . . Center-pin support, semi-floating, 26° total oscillation
Reduction gear . . . . . Spiral bevel gear
Differential gear . . . . . Conventional type
Final reduction gear . . . . . Planetary gear, single reduction

BRAKES

Service brakes. . . . . Hydraulically actuated, wet multiple-disc brakes actuate on four wheels
Parking brake . . . . . Wet multiple-disc brake
Secondary brake . . . . . Parking brake is commonly used

STEERING SYSTEM

Type. . . . . Articulated type, full-hydraulic power steering
Steering angle . . . . . 35° each direction (40° end stop)
Minimum turning radius at
  the center of outside tire . . . . . 6630 mm

HYDRAULIC SYSTEM

Steering system:
  Hydraulic pump . . . . . Piston pump
  Capacity . . . . . 195 L/min at rated rpm
  Relief valve setting . . . . . 24.5 MPa 250 kgf/cm^2
  Hydraulic cylinders:
    Type . . . . . Double-acting, piston type
    Number of cylinders. 2
      Bore x stroke . . . . . 90 mm x 441 mm
Loader control:
  Hydraulic pump . . . . . Piston pump
  Capacity . . . . . 260 L/min at rated rpm
  Relief valve setting . . . . . 34.3 MPa 350 kgf/cm^2
  Hydraulic cylinders:
    Type . . . . . Double-acting, piston type
    Number of cylinders—bore x stroke:
      Lift cylinder . . . . . 2- 140 mm x 881 mm
      Bucket cylinder . . . . . 1- 180 mm x 572 mm
  Control valve. . . . . 2-spool type
  Control positions:
    Boom . . . . . Raise, hold, lower, and float
    Bucket . . . . . Tilt-back, hold, and dump
  Hydraulic cycle time (rated load in bucket)
    Raise. . . . . 6.1 s
    Dump . . . . . 1.9 s
    Lower (Empty) . . . . . 3.8 s

SERVICE REFILL CAPACITIES

Cooling system . . . . . 61 L
Fuel tank (Specified capacity) . . . . . 413 L
Engine . . . . . 38 L
Hydraulic system. . . . . 173 L
Axle front. . . . . 59 L
      rear . . . . . 59 L
Torque converter and transmission . . . . . 65 L

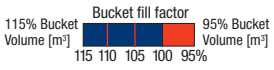
Apply the following weight changes to operating weight and static tipping load.

BUCKET SELECTION GUIDE

The size and type of the bucket should be properly selected depending on the density of the material and the expected bucket fill factor. Depending on the conditions, Komatsu buckets may perform more than rated capacity thanks to powerful boom linkage, efficient bucket shape and high rim-pull.



Expected density and maximum possible fill factor for each material

Material	Potential Fill factor [%]	Material density : kg/m^3 1000 1200 1400 1600 1800 2000
Earth/Clay	Up to 115	
Sand /Gravel	Up to 115	
Aggregate	Up to 110	
Rock	Up to 100	

Standard Boom

Type of Bucket	Rated Bucket Volume	Material density : kg/m^3 1000 1200 1400 1600 1800 2000
Light Material with B.O.C.	6.1 m^3	7.0 m^3 5.8 m^3
Loose Material with B.O.C.	4.9 m^3	5.6 4.7
Stockpile with B.O.C. / Teeth & Segments	4.6 m^3	5.3 4.4
Stockpile with Teeth	4.3 m^3	4.9 4.1
Excavating with B.O.C. / Teeth & Segments	4.1 m^3	4.7 3.9
Excavating with Teeth	3.8 m^3	4.4 3.6

BUCKETS & ATTACHMENTS

Buckets

Type	Feature	Image
Stockpile Bucket	This bucket is used for loading stockpile products, such as crushed rock and construction materials.	Excavating Bucket	This bucket is used for excavating and loading blasted rock on rock crushing job sites, or for excavating natural ground. It has a flat-blade, straight cutting edge, and provides superior rigidity and wear resistance.	Loose/Light Material Bucket	This bucket is used for loading materials with comparatively light specific gravity. It is based on the general purpose bucket, with a lengthened cutting edge and width to give increased capacity.	
Cutting Edges and Teeth

Type	Feature	Image	
Cutting Edge Segment Edge	This edge is made for use in loading loose sand and soil, or for loading stockpiled materials. It is bolted to the leading edge of general purpose buckets and may be detached and reversed. The cutting edges are manufactured from especially heat treated, high tension steel, and since they are reversible, both edges can be used. This effectively doubles their working life.	Bolt on Cutting edges (B.O.C.) 	Segment Edges (SE) Teeth (Bolt on type)	These teeth are suitable for loading or excavation of piles of earth or sand, blasted rock, and jobs in the field that involve digging into the side of slopes. The special heat treated, tensile strength steel alloy used in their production assures that they will wear and have a long service life.		
Teeth (Tip type)	These teeth tips which are attached to an adapter that is welded or bolted to the bucket edge. This means that an interchangeable part, the tooth tip, absorbs most of the wear and protects the actual bucket edge. They give excellent performance when used to handle blasted rock, piles of earth and similarly heavy duty tasks.	Welded adapter 	Bolt on adapter 
WEIGHT / DIMENSIONS

STANDARD EQUIPMENT

ENGINE/POWER TRAIN
- Air cleaner with dust indicator
- Engine, Komatsu SAA6D125E-5 diesel
- Parking brake, electric
- Service brakes, wet disc type
- Transmission, 4 forward and 4 reverse

ELECTRICAL SYSTEM
- Alternator, 24 V/50 A
- Back-up alarm
- Back-up lights
- Batteries, 2 x 12 V/136 Ah
- Directional signal
- Engine shut-off system, electric
- Front work lamps, LH and RH side
- Hazard lamps
- Rear work lamps, LH and RH side
- Starting motor, 24 V/7.5 kW
- Stop and tail lamps, and turn signal lamps

HYDRAULIC SYSTEM
- 2-spool valve for boom and bucket controls
- Hydraulic-driven fan with reverse rotation
- Lift cylinders and bucket cylinder

CAB
- Air conditioner
- Ashtray
- Automatic shift transmission with mode select system
- Cigarette lighter
- Cup holder
- Electronically controlled transmission lever
- Floor mat
- Front wiper (with washer and intermittent)
- Horn, electric
- Main monitor panel with Equipment Management Monitoring System
- Pillar cover
- PPC fingertip control, 2 levers
- Rear view mirror for cab
- Rear window washer and wiper
- ROPS/FOPS (ISO 3471/ISO 3449) cab
- Seat belt
- Seat, air suspension type with reclining
- Steering wheel, tiltable, telescopic
- Sun visor

WORK EQUIPMENT
- Boom kick-out
- Bucket positioner
- Counterweight, standard
- Loader linkage with standard boom

OTHER EQUIPMENT
- Coolant filter
- Extra poor fuel pre-filter
- Front fenders
- Fuel pre-filter with water separator
- Handrails for platform
- Hard water area arrangement
- Hydraulic oil filter
- Radiator
- Radiator mask, lattice type
- Rear under view mirror
- Tires and rims
- Tool box

OPTIONAL EQUIPMENT

ENGINE/POWER TRAIN
- Brake cooling system
- Engine pre-cleaner
- Limited slip differential (F&R)
- Lock-up clutch torque converter
- Secondary steering (ISO 5010)

ELECTRICAL SYSTEM
- Alternator, 24 V/75 A
- Batteries, large capacity, 2 x 12 V/140 Ah
- Batteries, Maintenance free, 2 x 12 V/136 Ah
- Battery disconnect switch
- Beacon guard
- Rotating light

HYDRAULIC SYSTEM
- 3-spool valve with lever and piping
- Hydraulic-driven fan with automatic reverse rotation

CAB
- AM/FM radio
- DC12V electrical outlets
- FNR selector switch
- Joystick steering
- Load meter
- Multifunction mono-lever
- Rear view monitoring system
- Seat, deluxe suspension seat

WORK EQUIPMENT
- Additional counterweight (380 kg)
- Bucket teeth (bolt on type)
- Bucket teeth (tip type)
- Cutting edge (bolt on type)
- Guard, side edge
- Segmented edges
- Various bucket options

OTHER EQUIPMENT
- Auto greasing system
- Compliant Bio diesel fuel
- Cool & heat box
- Electronically Controlled Suspension System
- Fire extinguisher
- Fire proof net
- Fller cap lcok & cover lock
- Large Fuel pre-filter with water separator
- Ordinary spare parts
- Power train guard
- Spec for sandy area
- Tool kit
- Various tire options, radial and bias
- Wheel stopper

KOMATSU TOTAL SUPPORT

Komatsu Total Support

To keep your machine available and minimize operation cost when you need it, Komatsu Distributor is ready to provide a variety of supports before and after procuring the machine.

Fleet recommendation

Komatsu Distributor can study the customer's job site and provide the most optimum fleet recommendation with detailed information to meet all of your application needs when you are considering to buy new machines or replace the existing ones from Komatsu.

Product support

Komatsu Distributor gives the proactive support and secures the quality of the machinery that will be delivered.

Parts availability

Komatsu Distributor is available for emergency inquiry by the customers for genuine, quality guaranteed Komatsu parts.

Technical support
